FARE Presents

A Gut Check on Biotics: U.S. Clinician Knowledge and Use of Pre-, Pro- and Synbiotics in Pediatric Food Allergy

Tuesday, November 10, 2026
1:00 p.m. – 2:00 p.m. ET

As research continues to uncover the complex relationship between the gut microbiome and immune health, prebiotics, probiotics, and synbiotics are increasingly being discussed as potential tools in the management of pediatric food allergy. Yet questions remain regarding clinician awareness, confidence, and real-world use of these interventions in clinical practice.

This webinar awards 1.0 CPEU in accordance with the Commission on Dietetic Registration's CPEU Prior Approval Program.

SPEAKERS

CARINA VENTER, PHD, RD
Professor of Pediatrics, Wake Forest University

QIAN YUAN, MD, PHD
Co-Director, Food Allergy Center & Senior Clinician, Pediatric Gastroenterology and Nutrition, Massachusetts General Hospital; Associate Professor of Pediatrics, Harvard Medical School

Session Overview

Expert speakers, Carina Venter, PhD, RD, and Qian Yuan, MD, PhD, will examine the evolving evidence base linking the microbiome to allergic disease, discuss the potential role of biotics in pediatric food allergy management, and explore opportunities for education and future research. Attendees will gain practical insights into current clinical practice trends and considerations for integrating microbiome-focused approaches into patient care.
