

Creating a Safer, Happier Halloween for all!

Make Halloween a magical and inclusive experience by taking part in the Teal Pumpkin Project (TPP).

FARE (Food Allergy Research & Education) runs TPP, which is a national program that makes trick-or-treating safer for children living with food allergy and other dietary restrictions.

We're excited about the magical power of the teal pumpkin—which, when placed on your doorstep (or pictured in a sign on your door), signals that, in addition to candy, you offer non-food treats.

It's easy to participate! All you need to do is:

1. Display a teal pumpkin (paint one, or grab one from CVS) or display one of the [free downloadable posters](#) from FARE.
2. Offer non-food treats alongside or instead of candy. Try stickers, pencils, bracelets, bouncy balls, or glow sticks. If putting out both candy and non-food treats, be sure to use separate serving bowls.
3. List your house or business on FARE's online [TPP interactive map](#), so trick-or-treaters know where to find safe treats.
4. Email healthequity@foodallergy.org to claim your patch.
